

FIND

Finds an object by its identifier.

FIND ONE BY ID

```
/**
 * Finds a single entity by a set of criteria.
 * @param array $criteria
 * @param array|null $orderBy
 * @return object|null The entity instance or NULL if the entity can not be found.
 */
public function findOneBy(array $criteria, array $orderBy = null)
{
    $persister = $this->_em->getUnitOfWork()->getEntityPersister($this->_entityName);

    return $persister->load($criteria, null, null, array(), null, 1, $orderBy); <<< Identity Map ?
}
```
